

Dear Community Member,

For the past 17 years Hometown Holidays has kicked off the holiday season and offered something for each member of the family. December 5, 2020 will be no different except this year the members of the Community Club who organize the event each year want all kids' activities to be by donation and FREE for all events.

Fisher-Titus Medical Center has very generously supported us with a donation for several years, which has helped keep the cost of admission as low as possible.

This year we are asking area businesses, organizations and others who are willing and able to participate in this worthy effort.

The enclosed flyer lists several levels of donations, each of which will help support the cost of making this year's Hometown Holidays the biggest and best ever!

Please visit our new website for details on our event and how to donate!!
